Dice Reference ..... A

CHAPTER 1

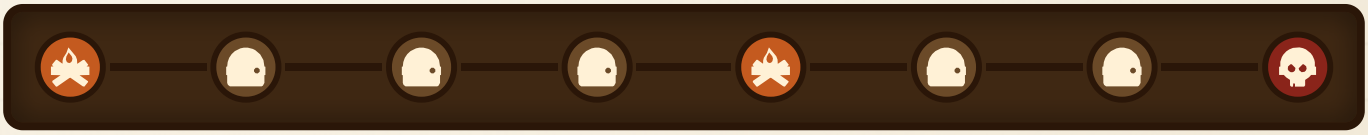

Goal & Run at a Glance

You are one Adventurer. Fight through **three dungeon floors** and defeat the **Big Boss** at the bottom.

Each turn your 16 dice are scrambled into a 4×4 **Tray**. Tap out a **Path** through the faces to attack, defend and heal. Every fight is a small puzzle; every victory is a new die or relic to build with.

The Route

Every floor is the same eight stops, shown on the Route bar at the top of the screen. Long-press any stop to see what it is.

Camp · Room ×3 · Camp · Room ×2 · Boss

A room is an **Enemy**, a **Trap** or a **Shrine**, and you only learn which when you open the door. Rooms get tougher along a floor: **Easy, Standard, Elite**, then after the second Camp **Standard, Elite**, then the Boss. On Floors 2 and 3 an Elite room is sometimes a **Deadly** foe instead (on Floor 1 only with the Dread depth modifier). The first room of a run is always an Easy Enemy. Shrines only appear in rooms that are normally Easy or Standard (Night Shift doesn't change that; they get more common deeper in the dungeon), and between two Camps (or a Camp and the Boss) you meet at most one Trap and one Shrine. **Forks:** at the two Elite rooms of each floor (the third room, and the second after the middle Camp) you see **two doors** and pick one: that room as usual (an Elite or Deadly foe, a Trap or a Shrine) or a Standard foe. Each door shows what kind of room it holds, not what is inside. Taking the Elite or Deadly door adds **one more loot choice**, drawn from the next floor's tier.

Floor	Loot	Enemy Health	Trap Health	Boss
1	Alloy	7 – 15	25	Rogue Golemancer, Heating Elemental or Grosteque Grafter
2	Gilded	21 – 36	33 – 45	The Necrorancher, Bellicose Biomancer or Ceramic Golem
3	Magic	32 – 67	70	**Big Boss:** Extruzeon, Myceleus or the Toadtaur Wizard

Health is shown at Depth 0. Deadly foes have more (up to 48 on Floor 2 and 77 on Floor 3), and some depth modifiers raise it further.

HOW YOU WIN

Defeat the Big Boss. The run ends in defeat when your Health hits 0 and your Back Pocket cannot save you; a save spends the whole Pocket. See Chapter 10.

CHAPTER 2

Starting a Run

On the character screen pick an **Origin** and a **Class**, optionally name your Adventurer (the name is cosmetic) and press **Enter the Dungeon**. You start with **20 Health**, an empty Back Pocket, and a Tray of 16 dice: **8 Attack Die I**, **7 Maneuver Die I** and your **Origin die**.

Choose your Origin

Your Origin sets your signature die.

Dwarf

Dwarven Doohickie

Shield up, then pop it for a big Hit.

Open from the start

Gnome

Gnomish Mushroom Cap

Damage over time and self-sustain.

Open from the start

Halfling

Bonus Breakfast

Healing and buffs.

Unlocks after you win a full run with any Origin

Pixie

Pixie Powder

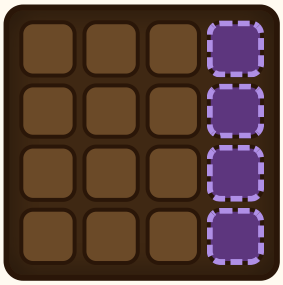

Blink past trouble, leave mischief behind.

Unlocks after you win with two different Origins

Choose your Class

Your Class gives you a **zone** on the Tray, highlighted in the Class color, and one ability that works inside it.

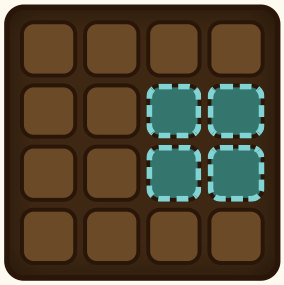

Armsmaster

The right column

Once per turn, turn any die in the zone into a **Hit 2**.

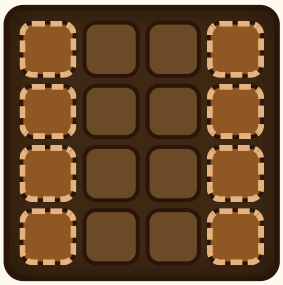

Guard

A 2x2 square on the middle right

Once per turn, turn any die in the zone into a **Block 1**.

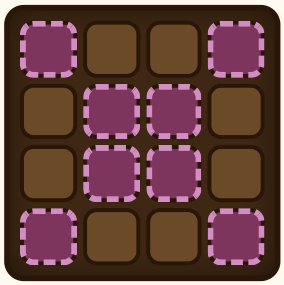

Dungeoneer

The whole left and right edges

The edges **wrap**: a Path can cross from one edge to the other on any row. Each face keeps its own move: a plain step crosses on the same row, a **Sidestep** crosses one row up or down, a **Pivot** either, and a **Leap** cannot cross. Each wrap also adds **+1 damage** to your next attacking die.

Arcanist

Both diagonals

Once on the X, a step from one X square to another may go **diagonally**, as if from a Sidestep. Steps onto or off the X follow the normal rules. Your **Boosts** are also 1 stronger (×2 becomes ×3).

Using a class skill

For Armsmaster and Guard, press **Skill**, then tap a die in your zone. **Blanks work too**, and they are the best ones to convert (so does a die under a Minion: the Minion comes off). The conversion lasts for that turn only, and **Clear** undoes it so you can use it again. Dungeoneer and Arcanist skills are always on. Your first fight with each class explains its skill once.

Starting Boon

Once unlocked, you can swap one of your Maneuver Die I for a Loot die you have collected **3 times** (in 3 different runs). A die carried over from a defeat replaces your extra Attack Die I. See Chapter 11.

CHAPTER 3

The Dice

Your power lives in your dice. Sixteen sit in the Tray and are scrambled every turn; any others wait in the **Back Pocket**. Each die has six faces, each either blank or an Action with a value. **Long-press any die** to read what its face does.

Die	What it is	Faces
Attack Die I	Basic damage die	
Attack Die II	Basic damage die	
Attack Die III	Basic damage die	
Maneuver Die I	Basic movement die	
Maneuver Die II	Movement, plus a Pivot and two Block 2	
Maneuver Die III	Movement, two Block 2 and a Boost	
Origin die	One per Adventurer	See Chapter 2
Alloy Loot dice	Common loot, Floor 1	20 dice
Gilded Loot dice	Rare loot, Floor 2	20 dice
Magic Loot dice	The strongest, Floor 3	16 dice

Basic dice show their level (I, II, III). Loot dice show the name of the item. Every Loot die is in the Dice Reference at the back.

The Back Pocket

The Back Pocket holds every die that is not in your Tray. Dice land there when a new Loot die replaces them (or when you keep a new Loot die in the Pocket), and you can swap them back at Camp. They are also your **safety net**: when your Health hits 0, your Back Pocket can save you once, but the save spends **every** die in it (Chapter 10). A red ♥ on Pocket means the safety net is ready.

CHAPTER 4

Taking a Turn

A fight is a series of **rounds**. The badge above the Tray shows the floor and round, e.g. *Floor II | Round 3*. Combat ends the instant either side reaches 0 Health, even mid-round.

1. **Scramble.** Every die takes a random face. This happens when a room opens and at the end of every round. A chest lid covers the Tray until you **flick it open** (swipe it up, shake your phone, or press Scramble); the faces are already rolled, the lid just reveals them.

2. **Build a Path.** Tap a die to start, then tap neighbors to extend. Tap the last die again to step back one. Clear removes the whole Path (tap it twice once you've built one). A running damage total and any *Lethal*, *Overkill* or *So close* hint update as you build. The chips over the enemy show what it will do **next turn** (a hit shows exactly what you will take before Block, after relics like Gambeson and Warding Bell), and if that would knock you out, your Health bar turns red with a ☠ **Lethal next turn** tag (it counts the Block, healing, Freeze or kill in the Path you're building).

3. **Go.** Your Path resolves one die at a time, in the order you tapped. The turn is locked in the moment you press Go: if the game closes while it plays out, Continue finishes that same Path. Skip fast-forwards the animation without changing the result.

4. **The reply.** Enemy takes its D.O.T.; enemy heals from its H.O.T., then acts (unless frozen); then you take your own D.O.T. and receive your H.O.T.

5. **New round.** Fresh Scramble. Back to step 2.

Example Path

Fig. 1 A five-die Path. **1** Boost ×2 → **2** Hit 2 (4 damage) → **3** Sidestep → **4** Combo 1, reached on a diagonal, with 3 neighbors showing Hit, Block and H.O.T. (1×(1+3) = 4 damage) → **5** Hit 1. **Total: 9 damage.**

Path Rules

- A Path may start on any die showing an **Action**. **Blanks** can never be part of a Path.
- A die can be used only **once** per Path.
- After most dice the next die must be directly **up, down, left or right**. Maneuvers change this:

  Sidestep → next die is **diagonal**

  Leap → exactly **two** **squares** away in a straight line (jumps the square between)

  Pivot → any of the **eight** neighbors
- Your Class zone can add moves (Chapter 2).
- You may press **Go** with a Path of just one die. If every die is blank, Go lets you pass the turn.
- Dice covered by a **Minion** count as blanks, but a Sidestep, Leap or Pivot may **land on** one (using its own move). The Path ends there, and when it resolves the die underneath is uncovered and used.

Swap and Reroll

Some dice have **Swap** or **Reroll** faces. Tap one to arm it (any time, even mid-Path), then tap a target die that isn't in your Path and isn't under a Minion. **Swap**: the two dice trade places. **Reroll**: the target lands on a different face that isn't blank. Once used, the Swap or Reroll die becomes a **Pivot** for the rest of the turn. **Clear** undoes Swaps; Rerolls stay.

Tokens

Shrines (and the Giant Killer relic) hand out one-use tokens, used from the **Item** button during a fight (not while a turn is resolving):

Nullify

Same as the Nullify face.

Freeze

Same as the Freeze face.

Boost ×4

Multiplies the first die of your next Path. Spent at turn end either way.

Swap

Tap any two dice to swap them. Clear refunds it.

Reroll

Reroll any one die to a different face that isn't blank.

Actions & Statuses

Action Faces

Hit N
Deal N damage.

Combo N
Deal N × (1 + neighbors) damage. A neighbor is a die directly up, down, left or right of the Combo (in your Path or not) currently showing a Hit, Combo, Block, H.O.T. or D.O.T.

D.O.T. N
Add N to the enemy's D.O.T.

Leech N
Add N to the enemy's D.O.T. *and* N to your own H.O.T.

Heal N
Heal N Health right now, up to your maximum.

H.O.T. N
Add N to your H.O.T.

Block N
Add N to your Block.

Boost ×N
Multiply the next Hit, Combo, D.O.T., Leech, Heal, H.O.T. or Block in your Path by N. Consecutive Boosts multiply (×2 then ×3 is ×6). Any other face in between wastes it.

Sidestep
Path may continue to a diagonal die. No other effect.

Leap
Path may continue exactly two squares away in a straight line. Clears a Minion in the square it jumps over, and may land on one.

Pivot
Path may continue to any of the eight neighbors. No other effect.

Fumble N
Add N to your *own* D.O.T. (never multiplied by Boost). The Path continues normally.

Freeze
Cancels the enemy's next move: a regular enemy skips its whole turn, even a heavy one; a boss still makes its every-turn attack but its special is cancelled. It still takes D.O.T. and heals from H.O.T.

Nullify
Clears everything it can reach at once: every Minion, your D.O.T. and the enemy's H.O.T.

Swap
Tap it, then another die: the two trade places. Afterwards it is a Pivot for the turn.

Reroll
Tap it, then another die: that die rolls a different face that isn't blank. Afterwards it is a Pivot for the turn.

Sidestep, Leap and Pivot are **Maneuvers**. They do nothing alone but count toward many quests.

Statuses

Status	How it works
Block	Absorbs incoming damage point for point and is used up as it does. It lasts for the current fight only.
D.O.T.	At round end the holder takes damage equal to its D.O.T., then it drops by 1 (3 deals 3, then 2, then 1). Your own D.O.T. ignores Block.
H.O.T.	At round end the holder heals equal to its H.O.T., then it drops by 1. Never above maximum Health. Your own H.O.T. is capped at 6.
Shield (enemy)	Some enemies gain Shield, which soaks up the damage you deal (Hits, Combos and quest bonuses) before their Health is touched. D.O.T. ignores Shield.
Minion	Covers a random die in your Tray so it counts as a blank (new Minions land after the roll, so you never see what's under them). **Each point of damage your Path deals clears one** (quest bonuses and D.O.T. do not), and so do a Leap over it, a Maneuver landing on it, your Skill, or Nullify (all of them). A cleared Minion leaves a blank until the next Scramble. Minions never carry over to the next fight.

Resets

Every status resets when a new room opens: your Block, D.O.T. and H.O.T., and all of the enemy's statuses. Only relics that grant Block at the start of a fight (Hard Hat Act, Stronger Infill) give you any. An armed Boost shows as a gold chip on your status row; long-press any status chip to read it.

CHAPTER 6

Encounters

Every door opens onto one Encounter. The doorway shows its name, Health bar, what it will do next turn, and any quests. The **Codex** Bestiary keeps a page for every foe you have met.

Enemies & Traps

Enemies are the dungeon's ordinary defenders. **Traps** have more Health (25 on Floor 1, 33 – 45 on Floor 2, 70 on Floor 3) and are meant to be beaten with quests rather than raw damage. Each turn an Enemy or Trap performs *every* action on its card in one go: it hits you, gains Shield, heals, channels H.O.T., adds to your D.O.T., or summons Minions. The chips over the doorway show each one as an icon and a number.

Elite and **Deadly** foes (tagged in the doorway) have **heavy turns**: an Elite every 3rd turn, a Deadly every 2nd. A heavy turn doubles its attack (or, with no attack, its biggest Minion, D.O.T. or Shield action; healing is never doubled). The chips count down ("Heavy in 2") and turn red the turn before.

Quests

Every Trap, most Bosses and many Enemies list **quests** on a Wanted poster. Completing one pays its reward at once, in full: there is no cap on quest damage. Quest damage hits Shield first, like your Hits. Quests are checked once your Path finishes, so "3 Maneuvers" means three Maneuver faces in one Path. Each quest counts once per fight.

Quests ask for: a number of Maneuvers, Sidesteps, Leaps, Pivots, Combos, Boosts, Heals, Blocks, support dice (Heal, H.O.T., Block) or Nullifies in one Path; blank dice left unused ("Blanks 10+"); a long Path ("Path 6+") or a short one ("Path 1-3"); a damage total in one turn ("Damage 10+"); a shape (route goals, below); an amount of H.O.T. gained or D.O.T. dealt in one turn; Block banked up ("Block 5+"); or reaching a certain round ("Reach Round 5"). Most rewards are damage, but some put D.O.T. on the foe, give you H.O.T., or trigger a Nullify or Freeze.

Route goals ask for a shape inside one Path instead of a count (hold the quest row in the game for its full rule): **2x2 square**, four dice of the Path filling a 2x2 square; **Move, Boost**, a Boost right after a Sidestep, Leap or Pivot; **Leap to Leap**, a Leap that lands on another Leap; **3 on a diagonal**, three dice in a row along one diagonal; **Pivot, Combo**, a Combo right after a Pivot; **4 in a line**, a full row or column one die after another; **Far corners**, a Path from one corner of the Tray to the opposite corner; **Edge path 5+**, five or more dice that never touch the middle four.

The two **Geometry** quests are standing rules instead: on Profane Geometry every H.O.T. you gain also lands on it as D.O.T.; on Sacred(?) Geometry every D.O.T. it takes also gives you H.O.T. The reward number caps the total.

Shrines

A Shrine is a room without a fight: press and hold it to receive its boon. Some offer a choice, and **bargain** shrines ask a price (maximum Health, or your next Camp rest) or let you walk away. Some shrines also hand you a loot pick (a Scroll Dispenser drops a die along with its scrolls; Madpie Nest and Storied Emporium add one to their relic), and a few let you take two Relics. Themed relic shrines offer relics from one family first.

Floor	Shrine	Boon
1	**Sacred Bellows**	+10 max health
1	**Expediting Spores**	A Maneuver I die becomes Maneuver II
1	**Ecclectrical Outlet**	Trade a loot die for one of three Alloy dice
1	**Half-Empty Fountain**	Heal 20 or +10 max health
1	**Scroll Dispenser: CRELA**	5 Nullify tokens, plus one of two loot dice
1	**Scroll Dispenser: AWSP**	3 Swap tokens (trade two dice, even mid-path), plus one of two loot dice
1	**Surgery Community Theatre**	Pick one of three offense relics
1	**Healthy Hearth**	Pick one of three defense relics
1	**Ark of the Flood**	Pick one of three path and movement relics
1	**Loot-Diagonalizer**	Pick one of three loot and tempo relics
1	**Blood-Drive Treats**	Pay 3 max health: pick one of four relics
2	**Enchanted Anvil**	Forge a Gilded die, or upgrade two Attack or two Maneuver dice
2	**Alchemists Stone**	+10 max health
2	**Department Spore**	Pick one of three relics
2	**Half-Full Fountain**	Heal 15 or +10 max health
2	**Scroll Dispenser: GIB**	3 Boost x4 tokens, plus one of two loot dice
2	**Scroll Dispenser: DOER**	3 Reroll tokens (reroll a die, even mid-path), plus one of two loot dice
2	**Blood of Spanneroth**	Pick one of three offense relics
2	**Ferrous Maiden**	Pick one of three defense relics

Floor	Shrine	Boon
2	**Thom's Guide**	Pick one of three path and movement relics
2	**Goldman's Rube Machine**	Runs all night: skip your next campfire to pick two of four relics
2	**Cryotherapist**	Heal 15 and 2 Freeze tokens
3	**Scrying Spheroid**	Swap a loot die for a random Magic die
3	**Heron's Fountain**	+15 max health
3	**Storied Emporium**	Pick one of three relics, then one of two loot dice
3	**Scroll Dispenser: TSOP**	2 Freeze tokens, plus one of two loot dice
3	**Ruinous Rune Room**	Pick one of three offense relics
3	**Indoctrination Inoculation**	Pick one of three defense relics, and +5 max health
3	**Charged Fae-Lines**	Pick two of four path and movement relics
3	**Madpie Nest**	Pick one of three loot and tempo relics, then one of two loot dice
3	**Faustian Spreadsheet**	Pay 3 max health: pick two of four relics
3	**Correctly-Designed Fountain**	Heal 20 or +10 max health

If you already own every Relic, a Relic Shrine heals 10 instead.

Bosses

Bosses guard the end of each floor. Every turn a Boss makes its **every-turn** attack **plus** the next **special** from its own list, which loops in order. The chips show the coming special a turn ahead; a **wind-up** (red) is a big telegraphed blow. Some specials bring their Minions with the warning, giving you one turn to clear them. Big Bosses switch to **Phase 2** after a turn that ends with them at half Health or less, with a new attack and list. Freeze cancels the special, not the every-turn attack. A Boss fight offers **three** Loot choices.

FLOOR 1 BOSS

Rogue Golemancer

30 Health

- **Every turn:** Hit 1
- **Summon Golems:** Minion 2
- **Wind-up Golem Lemma:** Hit 7
- **Brace:** Shield 4

FLOOR 1 BOSS

Heating Elemental

40 Health

- **Every turn:** Hit 1
- **Pre-heat:** H.O.T. 2
- **Wind-up Melting Point:** Hit 4
- **Scorch:** D.O.T. 2

FLOOR 1 BOSS

Grosteque Grafter

40 Health

- **Every turn:** Hit 1
- **Grafted Plate:** Shield 5
- **Wind-up Pruning:** Hit 5
- **Harvest:** Heal 4

FLOOR 2 BOSS

The Necrorancher

72 Health

- **Every turn:** Hit 2
- **Grazing:** D.O.T. 2
- **Wind-up Stampede:** brings 3 with its warning, then 2 per Minion
- **Cull:** Hit 7

FLOOR 2 BOSS

Bellicose Biomancer

75 Health

- **Every turn:** Hit 2
- **Mutagen:** H.O.T. 2
- **Wind-up Slammerhand:** Hit 8
- **Spore Cloud:** D.O.T. 2

FLOOR 2 BOSS

Ceramic Golem

105 Health

- **Every turn:** Hit 2
- **Glaze:** Shield 5
- **Wind-up Shatterpour:** Hit 7, drops its Shield
- **Seep:** D.O.T. 2

BIG BOSS · FLOOR 3

Extruzeon, Co-consul of Waste

173 Health

- **Every turn:** Hit 2 (+1 each hit)
- **Compactor:** Shield 4
- **Wind-up Extrue-damage:** Hit 8
- **Recycle:** H.O.T. 2
- **Phase 2 · Meltdown**
- **Every turn:** Hit 2 (+2 each hit)
- **Wind-up Atomic Pull:** Hit 9
- **Excessive Extrusion:** Minion 2, D.O.T. 2

BIG BOSS · FLOOR 3

Toadtaur Wizard, Assistant to the Co-consul

137 Health

- **Every turn:** Hit 5
- **Toxic Trample:** D.O.T. 2
- **Lily Padding:** Shield 5
- **Wind-up Chimeronslaught:** Hit 9
- **Phase 2 · Leap Year**
- **Every turn:** Hit 5 + Minion 1
- **Wind-up Lily Pod:** brings 3 with its warning, then 3 per Minion
- **Wind-up Chimeronslaught:** Hit 9

BIG BOSS · FLOOR 3

Myceleus, Co-consul of Rot

147 Health

Every turn: Hit 6

R.O.T.: D.O.T. 3

Spore-Up: Shield 4

Wind-up **Be Fruitful and Multiply!:** brings 3 with its warning, then 3 per Minion

Phase 2 · Fruiting Body

Every turn: Hit 5 + Minion 1

R.O.T.: D.O.T. 3

Wind-up **Be Fruitful and Multiply!:** brings 3 with its warning, then 3 per Minion

CHAPTER 7

After a Fight

When an Encounter reaches 0 Health it falls and a **loot chest** appears. The chest holds one pip for each die inside; tap it to open, then pick one die.

Source	Dice to choose from
Enemy or Trap	2
Boss or Big Boss	3
Overkill	+1
Elite or Deadly door at a fork	+1 (a die from the next floor's tier)
Need Before Greed relic	+1
Burden of Choice (depth)	−1, and no Overkill bonus (always at least 1)

Dice come from your floor's tier (Alloy, Gilded, Magic). You will not be offered a die you already own this run until the whole tier has been seen. Dice you've never collected carry a NEW tag.

OVERKILL!

If the killing blow carries **10 or more** damage past what was needed (6 with the Bloodthirst relic), you score an Overkill: a callout banner, a bigger chest, and one extra die to choose from. While building a Path the game warns you in advance with a Lethal or Overkill hint.

Taking the die. After choosing, pick one Tray die to replace and press **Replace**: the old die goes to your Back Pocket, not the bin, so you can swap it back at Camp. Or press **Keep in Pocket** to put the new die straight into the Back Pocket and leave your Tray as it is. If you hesitate, the game marks your weakest die as *Suggested* (you still choose). Unchosen dice return to the pool.

NO FREE HEALING

After loot, your Health is **not** restored. The route moves on to the next room or Camp.

CHAPTER 8

Camp

Camp is your only chance to reorganize. Every floor has two: one at the start and one after the third room. The very first Camp of a run (Base Camp) has no rest: its button reads Start Your Adventure.

1. **Organize.** Swap any Tray die with any Back Pocket die, as often as you like: tap one die in the Tray and one in the Pocket.

2. **The campfire: Rest or Train.** Each Camp's fire gives you **one** of these, so choose:
   - **Rest.** The Tray is scrambled and you heal **half the non-blank faces** it shows, rounded up (Percolation Theory adds 3; the Rationing Rations depth modifier halves or removes it). Resting also gives you a fresh scramble for the next room.
   - **Train.** Tap **Train** to unlock the combine buttons (until then they sit under a striped lock). Combine **3 matching Basic dice** (same type and level, Tray or Pocket) into one a level higher, up to III: one Attack and one Maneuver per Camp. If dice leave the Tray you need enough spare Pocket dice to refill. Loot dice can't be combined.

   The first Rest or Train at a Camp asks you to confirm, since the fire gives only one. Base Camp has no fire: combining there is free. Goldman's Rube Machine (a shrine) can cost you your next campfire.

Press **Break Camp & Continue** when you are done. It only asks first if the fire is still unused.

CHAPTER 9

Relics

Relics are **permanent passive perks** for the rest of a run. They take no Tray space and can't be lost or swapped. You can hold any number, never the same one twice. They show as badges above the doorway; tap to read, and watch them pulse when they fire.

Shrine Relics

Found at Relic Shrines. General ones (Department Spore, Storied Emporium) draw from every relic; themed ones draw from one family (offense, defense, path and movement, or loot and tempo); bargain ones (Blood-Drive Treats, Goldman's Rube Machine, Faustian Spreadsheet) charge a price. You are shown 3 you don't hold and keep 1. Blood-Drive Treats shows 4; Goldman's Rube Machine, Charged Fae-Lines and the Faustian Spreadsheet show 4 and let you keep 2. Inductive Step adds one more to every offer. Each family has its own gem: offense a red triangle, defense a blue emerald, path a green hexagon, loot and tempo a gold round, Origin a purple kite.

Some relics join the shrines later: Hard Hat Act, Perfect Fifth and Prime Edge after your first win; Scavenger's Acumen, Evasion Tank and Minus-One Mantra after you clear Depth 1. Until then the Codex shows them as locked.

PE
Prime Edge
Your first Hit each turn deals +2 damage.

LB
Mandated Lunch Break
Heal 2 after every victory.

MM
Minus-One Mantra
Every enemy attack deals 1 less damage.

NG
Need Before Greed
Loot rewards offer +1 die to choose from.

PT
Percolation Theory
Resting at Camp heals 3 extra.

HH
Hard Hat Act
Start every fight with 3 Block.

KB
Klein Bottle
+8 maximum Health, immediately.

PF
Perfect Fifth
A Path of 5 or more dice deals +3 damage.

ED
Exponential Decay
Every D.O.T. face you play adds +1 D.O.T.

BT
Bloodthirst
Overkill triggers at 6 extra damage instead of 10.

UH
Union Health Plan
Every Heal face you play heals +1.

NT
Nature's Thorns
Each Block you gain from your path also deals 1 damage.

PW

Power Word: Safe

Healing past your maximum health becomes Block.

SA

Scavenger's Acumen

Every 6 damage you deal in one turn heals 1.

EO

Equal and Opposite

Whenever your Block absorbs an enemy hit, the enemy takes that much damage.

SM

Strength in Mooks

Each Minion you clear gives 1 Block.

ET

Evasion Tank

Each Sidestep in your path gives 1 Block.

TV

Terminal Velocity

Each Leap adds +1 damage to the next damaging die in your path.

FT

FTLeporter

Your Pivots can teleport: the next step may go to any die.

GK

Giant Killer

Start each boss fight with a Freeze token.

BM

Bisection Method

The first heavy turn or boss wind-up each fight deals half damage.

IS

Inductive Step

Relic and loot shrines offer one extra choice.

CO

Combonatorics

Combo dice also count diagonal neighbors.

Origin Relics

Never offered at Shrines. **Winning a full run with an Origin earns that Origin's relic**, and every later run as that Origin begins with it.

SI

Stronger Infill

DWARF

Start every fight with 1 Block.

MB

Mycorrhizal Bond

GNOME

Leech faces also add +2 D.O.T. and heal +1 more.

CB

Coffee Break

HALFLING

H.O.T. faces add +1 H.O.T.

FF

Faerie Fire

PIXIE

Each Sidestep, Leap or Pivot in your Path adds +1 damage to its last damaging die (at most +2 per path).

The Codex (Settings or title screen) has a Relics tab listing every relic; ones you haven't been offered appear as locked mystery slots.

CHAPTER 10

Defeat

When your Health reaches 0 the game checks your Back Pocket before ending the run.

1. If the Pocket has dice, they are **rolled** one at a time in random order.
2. The first one that lands on any **Action** saves you: you are restored to **5 Health** and the fight goes on.
3. Saved or not, **every die in the Back Pocket is spent**. Any Pocket is a full safety net, but it can't keep saving you: it arms again when a new die lands in your Pocket (usually your next loot).
4. If every die lands blank, or the Pocket is empty, the run ends.

Combining dice at Camp warns you if it would use your last spare dice.

Carry a die forward

On the Defeated screen you choose one of the highest-tier dice in your Tray (your best Loot dice, if you have any) to carry into your next run, where it takes the place of your extra Attack Die I.

After a defeat the screen also names your **next goal** (what your first win unlocks, or the relic a win with this Origin earns) and says when you got further than ever before. Win or lose, the end screen shows a **Run Card**: your Adventurer, depth, how the run ended, damage, best turn, Block, foes beaten, final Tray and relics. **Save Card** saves or shares it as a picture; **Details** opens achievements and the run summary.

CHAPTER 11

Progression & Records

The game remembers every run on your device. None of this changes how a turn is played; it decides what a new Adventurer can start with, and celebrates what happened on the way.

Unlocks

- **Origins.** Dwarf and Gnome from the start. **Halfling** unlocks after you win with any Origin. **Pixie** unlocks once you've won with two different Origins.
- **Origin Relics.** Your first win with an Origin earns its relic. The victory screen announces it; the character screen shows it as a locked slot until then.
- **Starting Boons.** Swap your first Maneuver Die I for a Loot die you've collected **3 times** (a run never offers the same die twice, so that means 3 runs; Keep in Pocket counts). Tiers open as you progress: Alloy after your first win, Gilded after reaching Floor 3, Magic after winning with every Origin. The Codex shows "Collected n/3" for each die. Tap the star on a die to favorite it.
- **Carried die.** The die you carry after a defeat is used in your next run only.

Depth

After your first win, the character screen lets you go **deeper**. The base dungeon is **Depth 0**; each rank of a modifier adds depth, and you may choose up to 2 deeper than your best clear. Deeper runs score more (×1 + ¼ per depth).

Modifier	Ranks	Depth per rank	Effect
Tougher Scuffs	4	1, 1, 1, 1	*1:* Enemies and bosses have +15% HP. *2:* Enemies and bosses have +30% HP. *3:* Enemies and bosses have +45% HP. *4:* Enemies and bosses have +60% HP.
Rationing Rations	2	1, 1	*1:* Camp rest heals half as much. *2:* Camp rest heals nothing.
Clumsy	3	1, 1, 2	*1:* Start with 4 less max HP. *2:* Start with 8 less max HP. *3:* Start with 12 less max HP.
Swarming	2	1, 2	*1:* Minion spawns place 1 extra die. *2:* Minion spawns place 2 extra dies.
Burden of Choice	1	1	Overkills add no loot option, and every loot reward offers one fewer die.
Zeal	2	3, 1	*1:* Every enemy hit deals +1 damage. *2:* Every enemy hit deals +1 damage, and heavy turns and boss specials +1 more.

Modifier	Ranks	Depth per rank	Effect
Dread	3	1, 1, 1	*1:* Deadly encounters are 12% more likely to take an Elite room, Elite and Deadly foes have +20% HP, and Floor 1 gains its own Deadly card. *2:* Deadly encounters are 24% more likely to take an Elite room, Elite and Deadly foes have +40% HP, and Floor 1 gains its own Deadly card. *3:* Deadly encounters are 36% more likely to take an Elite room, Elite and Deadly foes have +60% HP, and Floor 1 gains its own Deadly card.
Union Dues	1	1	Receiving a shrine's boon costs 2 HP.
Rounding Error	1	2	Your Heal faces heal 1 less (never below 1).
Night Shift	2	1, 2	*1:* Easy rooms become Standard rooms. Shrines appear as usual. *2:* Easy and Standard rooms become Elite rooms. Shrines appear as usual.

Each Class shows a **badge** in its own shape (Guard a shield, Armsmaster crossed swords, Arcanist a star with an X, Dungeoneer an archway) with the deepest depth you've cleared with it. Clearing deeper also earns account-wide **dice finishes**, a metal border on your Tray dice, and a title: **Bronze** at Depth 3 (Delver of the Deep), **Silver** at 5 (Dread Delver), **Gold** at 7 (Dungeon Breaker) and **Royal** at 9 (Scourge of the Dungeon).

Records

- **Achievements** are lifetime milestones: First Blood, Dungeon Conqueror, Two Roads, Jack of All Trades (every Origin), Master Tactician (every Class), Into the Deep, Overkill Enthusiast, Shrine Seeker, Monster Hunter, Veteran Adventurer and Heavy Hitter. They never change gameplay.
- **Run Highlights.** The end-of-run screen (under Details) shows your biggest single turn, biggest Overkill, longest Path and Close Calls. A gold NEW BEST appears when one of the first three beats an earlier run.
- **Close Calls.** A turn that leaves a foe with 3 Health or less, or a kill 1 to 3 damage short of an Overkill, is called out on screen ("Just 2 HP left!"). Information only.
- **Records** (Settings or title screen) holds your Run History (last 20 runs), Achievements and **Backup**: a code holding this device's progress (unlocks, dice, Codex, records, a saved run). Paste it on a new phone to restore it.
- The **Codex** has four tabs: **Bestiary** (every foe you've met, with its moves, quests, flavor and your wins and losses), **Dice** (Origin dice and every Loot die you've collected), **Relics** and **Key** (every action icon, tap for its rule).

Settings & Play Data

The gear menu holds **Sound effects** and **Music** volume sliders, Reduce motion, Gentler effects, Vibration and the play-data switch, plus the Log, How to Play, Codex, Records, Abandon Run and **Reset Progress**, which erases all unlocks, records and depth bests. With a keyboard, Enter is Go, Backspace is Clear, and the keys 1234 / qwer / asdf / zxcv tap the matching Tray die. **Export Play Data** packages your recent runs as a file for playtest feedback. Early in your first run (after your first loot pick) the game asks once whether to share play data; if you say yes, your runs are sent with a random device id, screen size and any error messages (no names), including a copy of a run still in progress, so runs that stop midway count too. The Backup tab shows that id.

CHAPTER 12

Quick Reference

START
20 Health · 16 dice · empty Pocket

FLOOR
Camp · 3 rooms · Camp · 2 rooms · Boss · two doors at each Elite room

LOOT
2 dice (3 for Bosses) · +1 Overkill · +1 Need Before Greed · Replace or Keep in Pocket

OVERKILL
10+ past lethal (6 with Bloodthirst)

CAMPFIRE
Rest (heal ½ of non-blank faces) OR Train (combine dice) · Base Camp: combine free

TRAIN
3 matching Basics → 1 a level higher

REVIVE
Pocket dice rolled · first Action → 5 Health · the whole Pocket is spent

STATUSES
All reset when a new room opens

D.O.T. / H.O.T.
Trigger at round end, then drop by 1

BOOST
Multiplies the *next* value face only

MINIONS
1 cleared per damage dealt · Leap over or land on clears one · Nullify clears all

HEAVY TURNS
Elite every 3rd turn · Deadly every 2nd

BOSSES
Every-turn attack + a telegraphed special · Phase 2 at half Health

SWAP / REROLL
The used die becomes a Pivot for the turn

From the Tabletop

Dungeon Scramble began as a physical dice game. The video game grew from those rules and now goes its own way: bigger numbers, boss kits, Minions and relics that would be a chore by hand. It scrambles the dice, tracks every counter and shuffles the encounters for you. The tabletop's multi-Adventurer co-op is not part of the video game yet; for now this is a **solo** experience.

APPENDIX

Dice Reference

Every Loot die in the game, with all six faces. Faces are tinted by tier.

Alloy Floor 1 Loot Dice (20)

Greathammer

Spiked Shield

Buckler

Whip

Dagger

Longbow

Unlabelled Mixture

Healing Draught

Tarot Deck

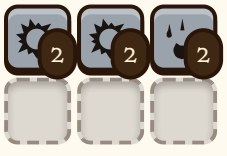

Lance

Greataxe

Claymore

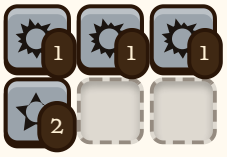

Rapier

Longsword

Crossbow

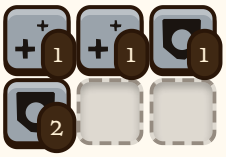

Blunderbuss

Ironskin Draught

Acid Potion

Grappling Set

Medsack

Gilded Floor 2 Loot Dice (20)

Hidden Estoc

Greaterhammer

Hataxe

Triage Turret

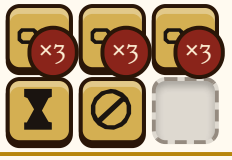

Eye-Frame

Drafter's Draught

Thorned Bulwark

Cool Whip

Humor-inverter

Winged Boots

Drill Shield

Maximum Capacitor

Mining Mines

Charge-Atlatl

Portable RNGenerator

Poison Sword

Sporific Staff

Genetic Drifter

Leeching Lance

Pleasant Parasite?

Magic Floor 3 Loot Dice (16)

Greatesthammer

Dodecahedron of Future Pasts

Legendary Sheath

Warp Crossbow

N-th Dimensional Printer

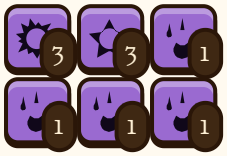

Aloo'Minium Armor

Phlebotomizer

Straw of the Last Lamia

Hospitaler's Merciful Guillotine

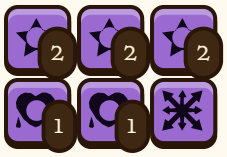

Glacial Gorget

Pre-handy-sile Tail

Measurably Lucky Test Tube

Axiom of Choice

Trained Transposer

273.15 Kelvin Box

Exile Elixir
